

PRESS RELEASE

Almeco-TiNOX now a 100% subsidiary of the Almeco Group

We are pleased to announce that Italy's Almeco Group has taken over all of the shares in Almeco-TiNOX GmbH effective on 9 May 2011. Up to now, the Italian group held 50 percent of the shares, with Germany's MAGE Group holding the other half.

Today, Almeco-TiNOX GmbH manufactures its highly selective absorbers and highly reflective solar mirror coatings in the world's most modern systems for the coating of metal sheets in Bernburg (Saxony-Anhalt). The new ownership will not change any of that. We can therefore ensure that our customers will continue to receive the utmost quality and reliability.

And of course, our customers will also still continue to benefit from the Almeco Group's global service and distribution network. In addition, we will expand our production plant in Bernburg to offer you even more services and new products.

There is also continuity in the staff of Almeco-TiNOX, which remains available to serve you as you have come to expect. If you have any questions about the takeover, feel free to contact us. We will also be pleased to answer your questions at Intersolar, where you will find us in hall B1, stand 490.

We look forward to continuing our successful partnership with you in the future!
